

Polish expertise for Canadian business

Secure IT operations and delivery through personal partnership

5red Sp. z o.o. is an IT services company based in Poland. We help Canadian businesses and IT providers strengthen daily operations and deliver projects with a dedicated specialist, a project team or a managed service.

250+

experts in our resource pool

14h

operations across two shifts

8h

Canadian workday overlap

Services for your business

Managed IT. Reliable infrastructure, Microsoft 365 and business application operations.

Cloud and DevOps. Architecture, migrations and automation that move projects forward.

Security and resilience. Identity, access, hardening, backup and incident coordination.

Software and AI. Development, AI solutions and integrations for your business needs.

Canada and Poland working together

Your market knowledge and customer relationships combine with our technical expertise. Named contacts who communicate in English, joint planning and regular reviews keep work aligned. For IT partners, delivery under your brand can be agreed.

Security and trust

Protect your information and relationships

Written confidentiality and customer protection terms establish the basis for cooperation.

Agree data controls before access

Before access, we agree data handling, approved environments and locations, cross-border access, MFA, permissions, encrypted connections and logging.

Make responsibility visible

Our approach aligns with ISO/IEC 27001 and ITIL practices. Agreed SLAs and OLAs define scope, ownership, response targets, change rules and incident escalation. Regular reporting gives you visibility.

Commercial clarity

We agree budgets and acceptance criteria. We target 25-30% lower delivery costs than equivalent Canadian services, depending on expertise, scope and coverage.

Service coverage around your working day

Poland 08:00-22:00 across two shifts | Canadian Eastern Time

Maintenance window

02:00-06:00 ET

Poland 08:00-12:00

Early shift

06:00-08:00 ET

Poland 12:00-14:00
